

AYSHA NASRIN M

Full Stack Python Developer | FastAPI · Flask · Python

Ramanathapuram, Tamil Nadu, India

+91 8148102606 | ayshanasrin2606@gmail.com | github.com/aysha-nasrin26 | <https://www.linkedin.com/in/aysha-nasrin-a5a5b32b0/>

PROFESSIONAL SUMMARY

Full Stack Python Developer with hands-on experience designing and implementing scalable web applications, REST APIs, and database systems using FastAPI, Flask, React, and MySQL. Expert in building secure authentication systems (JWT), optimizing database architecture (SQLAlchemy ORM), and writing testable, maintainable code with comprehensive unit testing (Pytest). Demonstrated ability to build production-ready applications from architecture design through deployment. Proven problem-solving skills with a Gold Medal in BCA and consistent top-rank achievements. Passionate about clean code, API documentation, and debugging complex systems.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML5, CSS3, JSON

Frameworks: FastAPI, Flask

Databases & ORM: MySQL, SQLAlchemy, Database Design, Query Optimization

Developer Tools & Version Control: Git, GitHub, VS Code, Swagger API Documentation

Core Concepts: REST APIs, JWT Authentication, CRUD Operations, Problem-Solving, Object-Oriented Programming

PROJECTS

TaskFlow — Full Stack Task Management System[\[GitHub\]](#)

Tech Stack: FastAPI, React, MySQL, SQLAlchemy, JWT Authentication, Pytest, Swagger API

- Architected a production-ready full-stack task management application using FastAPI backend, React frontend, and MySQL database with 99.9% uptime and sub-100ms response times.
- Implemented secure JWT-based authentication with role-based access control, session management, and RESTful APIs supporting complete CRUD operations, filtering, pagination, and advanced features like priority tagging and due-date tracking.
- Engineered a high-performance database schema using SQLAlchemy ORM with query optimization and indexing for efficient data management and retrieval.
- Wrote unit tests achieving 85% code coverage using Pytest and FastAPI TestClient, validating authentication workflows, API endpoints, and error handling for production deployment.

AI Chatbot for College Management[\[GitHub\]](#)

Tech Stack: Python, Flask, MySQL, HTML, CSS, Jinja2

- Developed an intelligent Flask-based chatbot delivering automated, 24/7 support for 500+ student queries with 90% response accuracy and secure user authentication.
- Implemented persistent chat history management using a MySQL database schema for efficient storage, retrieval, and multi-session conversation tracking.
- Designed a responsive admin dashboard with Jinja2 templating and Bootstrap styling, enabling administrators to manage chatbot responses and analyze usage analytics.

Student Management System [\[GitHub\]](#)

Tech Stack: Python, Flask, MySQL, HTML5, CSS3, Bootstrap, Jinja2

- Developed a responsive web-based Student Management System using Flask and MySQL to manage student records efficiently.
- Implemented complete CRUD operations, enabling users to add, view, update, and delete student information.
- Integrated MySQL database with search functionality and Flask flash messages to enable efficient student record management and real-time user feedback.

EDUCATION

Bachelor of Computer Application (BCA) - Gold Medalist

Syed Ammal Arts & Science College, Ramanathapuram, Tamil Nadu | Graduated: April 2026 | CGPA: 8.5/10

Honors: Gold Medalist (Rank 1), Class Topper (All 3 Years), Class Representative (2023-2026), Class First Award Recipient

CERTIFICATIONS

- HCL Technologies Industrial Training & Industrial Visit (2026)
- Infosys — Python Programming Certification
- SoloLearn — HTML Certification

ACHIEVEMENTS

- Class Representative — Served as primary liaison between 80+ students and faculty for three consecutive years (Leadership & Communication)
- AI for Livelihood Workshop Participant — Hands-on exposure to practical AI applications and real-world problem-solving
